DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: It is suggested that the spelling of "polyamidimide" in claim 6 be changed to "polyamideimide" to remain consistent with the art and with claims 12 and 15. The attempt to make a correction in the amendment is noted, however an "e" was added with double bracketing rather than an underline. Also, it is suggested that the first instance of "polyimide" be deleted from claim 1 for clarity.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 7 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claims 7 and 13 each recite the limitation "the polyimide based stiffening agent" in line

1. There is insufficient antecedent basis for this limitation in the claim because of the amendment to independent claims 1 and 9 that removes the "polyimide based" recitation.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1724

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1 and 3-18 are rejected under 35 U.S.C. 102(b) as being anticipated by EP

0726348 A1.

7. EP '348 teaches a gas permeable filter for use in filtration applications at temperatures of over 375° F (p. 2, lines 34-39), comprising a pleated glass or polyphenylene sulfide substrate (p. 2, lines 40-49) that is treated with a polyamideimide film at 1-30% by weight (p. 3, lines 14-19) to rigidize the filter.

Response to Arguments

8. Applicant's arguments filed August 29, 2003 have been fully considered but they are not persuasive. Applicant argues that the filter treating composition in the EP patent does not anticipate the stiffening agent "consisting of a polyimide" as recited in the amended claims because the EP patent composition contains both a fluoropolymer and a polyimide rigidizing film. It is submitted that the fluoropolymer is not part of the stiffening agent, but is instead used for chemical protection and lubricity under end-use operating conditions (see p. 2, lines 50-51). The polyimide rigidizing film is only part of the filter-treating composition, and this part is interpreted to meet the limitation of a "stiffening agent consisting of a polyimide" of the instant claims.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1724

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
